### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the record of prior art does not show a controllable magnetic bearing apparatus (or a method for determining a machine type of a magnetic bearing) comprising means for (or the steps of) determining a machine type of the magnetic bearing based on the amount (or mean amount) of movement and setting control parameters.

The most relevant prior arts include U.S. Pat. No. 5,772,564 issued to Taniguchi et al., U. S. Pat. No. 6,404,088 issued to Barada et al. and JP 10-122182 issued to Yamaguchi. However, Taniguchi et al. show a magnetic bearing device comprising means for measuring the weight of the tool element by measuring the exciting current of the magnetic bearing. Taniguchi et al. do not measure any amount of movement. In contrast, Barada et al. measure the amount of movement and calculate the mean value so that the position of the shaft can be corrected. The circuit of Barada et al. cannot determine the machine type of the magnetic bearing. Moreover, Yamaguchi discloses a circuit determining the type of machine based on the resistance and inductance. The circuit of Yamaguchi does not determine the type of machine based on the amount of movement of the rolling element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
